"CHASING RAINBOWS: DISCOVER THE SPECTACULAR SEVEN COLOURED EARTH'S"

The Seven Coloured Earths, a geological marvel in Mauritius, showcases a stunning and surreal landscape where the earth's surface is naturally painted in vibrant hues of red, brown, violet, blue, green, yellow, and purple. This striking phenomenon is the result of volcanic activity that created unique layers of mineral-rich soil, which have weathered over time to form the colorful dunes. Set within the lush backdrop of Chamarel, the Seven Coloured Earths is not only a visual feast but also a captivating testament to the island's dynamic geological history, drawing visitors from around the world to witness its extraordinary beauty and the delicate play of colors that shift with the light.

TIPS

- ✓ Opt for comfortable walking shoes or sandals
- ✓ Protect Your Camera Gear from dust
- ✓ Visit early morning or late afternoon to avoid crowds.
- ✓ Have some cash on hand for entrance fees or souvenirs
- ✓ Consider a Guided Tour
- ✓ Check Weather Conditions before your visit

DID YOU KNOW?

- The Seven Coloured Earths are formed from volcanic rocks and minerals that have weathered over time, resulting in vibrant dunes with distinct colors like red, brown, violet, and green.
- Despite heavy rain and weathering, the colors of the dunes remain stable and vibrant due to the unique mineral composition and the way the soil has been layered.
- The site is located near Chamarel, a village with rich cultural heritage, and the Seven Coloured Earths are a popular symbol of Mauritius's natural beauty and geological history.
