## "NGORONGORO CRATER: AFRICA'S EDEN IN A VOLCANIC BOWL"

The Ngorongoro Crater, often referred to as the "Eden Garden" and recognized as the "Eighth Wonder of the World," is a breathtaking natural marvel located in northern Tanzania. This stunning caldera spans over 260 square kilometers and is home to a remarkably diverse ecosystem. Enclosed within its high walls are lush grasslands, forests, and a permanent water source, creating a haven for an array of wildlife species, including lions, elephants, cheetahs, and the endangered black rhinoceros. The Ngorongoro Crater's unique setting allows for exceptional wildlife viewing and offers an unparalleled opportunity to witness animals in their natural habitat. With its remarkable beauty, ecological significance, and the title of an "Eden Garden," the Ngorongoro Crater is a testament to the extraordinary wonders that the natural world has to offer.

- ENVIRONMENTAL AND SOCIAL RESPONSIBILITY

**TIPS**

- Make reservations well in advance
- Use a 4x4 Vehicle to navigate the terrain safely
- Check weather conditions before heading out
- Maintain a safe distance from animals and follow the park's guidelines
- carry plenty of water and some snacks, especially if you plan to spend the whole day exploring.

**DID YOU KNOW?**

- Ngorongoro Crater is a massive caldera formed by a volcanic explosion, which once contained a lava lake before it dried up.
- Nearby Olduvai Gorge, part of the Ngorongoro Conservation Area, is known for its significant fossil discoveries related to early human ancestors.
- The Maasai people have lived in the Ngorongoro area for centuries, coexisting with wildlife and maintaining their traditional lifestyle within the park boundaries.
